Training is the final process of our Recruitment.

“

## Our Services: Business Savings and Peace of Mind

As a service provider, Agile will achieve this ambition through its people. Our aim is to have the right people with the right skills, in the right place at the right time.

”

## Statutory compliance

Complying regulatory requirement is definitely enhancing our reputation. Thanks to all our clients, they are fully supporting us to achieve this most important part of the business. Our Regulatory compliance sets out the key objectives that will ensure that we remain a good and fair service provider and employer. We focus on excellent customer service and our employees must feel they are genuinely valued, empowered and can make a difference in their work place.

## Feedback

Customer feedback plays very vital role in our business and it make us to grow continuously. The customer feedback is nothing but an opinion of our customer about our service. Their opinion is a resource for improving customer delights and adjusting our service deliveries to match with their needs. We stay much ahead of our competition because we continuously listen to our customer carefully. But it helps us to correct ourselves and grow much ahead of our competitions.

## Supervisory visits & night checks

A fully equipped 24x7 control room provides enhanced control and command over sites/units during the night, ensuring continuous monitoring, effective communication, and swift response capabilities.

## Reporting

We have continuous, periodical reporting systems like training report, night check report, and monthly security reports to contently measure our service deliveries. We have periodical feedback systems to understand the gap between the delivery and expectations. Our clients' complaints and feedback systems always help us to grow with our clients.

## Benefits

Our skilled security professionals are trained to assess and mitigate potential risks, providing clients with a heightened sense of safety and security. With our knowledgeable security personnel on hand, clients can feel confident that their safety and security needs are being effectively managed.

# Integrated Security Solutions

## Why do we need a security system

Security systems are very necessary these days to support the manned security. The world is very uncertain and unsecured. It is impossible to predict any incident such as burglary, robbery, and white color crime without proper security system installed. That is why it is important for us to know more about different types of security systems.

## Advanced Security Systems to protect business and valuables

Electronic Security Systems refers to a variety of systems that increases protection levels. HHMD, DFMD, Baggage Scanner, Access Control Systems/doors, CCTV, Bio-Metrics, Badges and Tags, Intrusion Detection Systems, Alarms, Smoke Detectors, Heat Detectors and emergency communication equipment.

Security Equipment provides the first line of defence when it comes to the detection and prevention of unauthorized access to facilities. It is important to have strong individuals to support the administration of these systems. We can assist with several aspects of Electronic Security including: Installation Management and Maintenance. We also do undertake Annual Maintenance Contracts for all security Equipment.

## Benefits

Agile provides one stop destination for all your security equipment needs. We have capable and experienced hands to install sophisticated and delicate parts of the security equipments. Maintenance works are carried out by trained professionals to ensure your security equipments remain in good working conditions.

“

## The Importance of Professionalism

### Remote Monitoring for your Security System

Most CCTV security systems don't have a human watching them live and are either naively used as a visual deterrent or people view the recorded CCTV footage retrospectively to watch the break-in after the damage has been done. Our trained professionals monitor live CCTV footage to prevent the incidents.

”

# Remote Monitoring Management

## What is Remote Monitoring?

Remote Monitoring (RMON) is a standard specification that facilitates the monitoring of network operational activities through the use of remote devices known as monitors or probes. RMON assists network administrators (NA) with efficient network infrastructure control and management.

## Remote CCTV Security Monitoring

Remote monitoring technology is now significantly advanced. Either using cellular devices or high-speed desktop Internet, CCTV cameras can now be monitored remotely and in real time by trained security professionals working in pleasant and stimulating environments and supported by sophisticated software.

The era of the lone on-site security guard dozing in front of a bank of flickering screens is over - remote security monitoring is the way forward.

Our professionally trained staffs monitor all our clients facilities 24/7. Our integrated audio and video security alarm system monitoring takes your security to a new level with the best guarantee in the industry.

We even make recommendations to you as remote CCTV 24/7 monitoring provides lots of data that can help you improve the physical security at your premises. The more you know about your site and its weak spots, the better prepared you'll be.

## Benefits

Remote Monitoring Systems are very easy to use. You can monitor your home or business from anywhere in the world. This is ideal for those who have multiple sites including ATM's. Having Remote Monitoring Systems always help us to have better control during emergency situations.

# AGILE SECURITY FORCE TRAINING ACADEMY

# Training A Master Key To Success

Training plays a vital role in any industry. It will impact on organization's productivity and performance. The training helps both individuals and Industries to grow.

The Agile Training Academy, imparts vigorous training to the younger generations who are inspiring to take up their career in the field of security. The training provides a better understanding of their responsibilities, skills and the knowledge to the security personnel's, they need to perform as a guarding personnel. This will improve their confidence and efficiency which can positively impact their overall performance.

Like in any other Industry, the technology in the security Industry advances and workplace strategies evolve, there comes a need for trained personnel to align with these changes in terms of knowledge and skills. The best ways to enhance knowledge and skills is through effective training.

Further, to acknowledge the acquired skill sets gained through experience, knowledge, and capabilities, a special training is also being imparted to the existing guards in our academy to recognise their acquired learning as Recognition of Prior Learning (RPL).

"Investing in people is simply more profitable"  
We train our youth and mould them to match with need of Guarding Industry, to increase profits / benefit to our customer.

Recognised and certified by:

## Benefits

It is important that security personnel are trained in every aspect of security matters. Trained person has higher sense of risk assessment and judgement to act appropriately. Only a trained person has the ability to reduce losses if ever any mishap has to happen. They are reliable and stand out with a higher level of quality service on the job.

# A Five Star Training Academy
